WORK EXPERIENCE

SENIOR FULL STACK DEVELOPER
Acsendion (November 18, 2024-July 14, 2024)
Developed and upgraded legacy websites into modern web applications for **CITY SAVINGS BANK**, emphasizing responsive design, user friendly experience and also optimization queries. Enhanced site performance and integration of Temenos API & Sunline API, resulting in a faster and more user-friendly web application.

Projects:
- **MCLOAN API**
  Description: *Developed an internal system primarily utilized by employees for processing motorcycle loans, streamlining workflows and enhancing operational efficiency.*
  Key Technologies: *C# Core MVP, Entity Framework Core, Sunline API & Temenos API, MSSQL, GITLAB-CI, DOCKER*

- **PORTAL ADMIN WEBSITE**
  Description: *Designed and implemented an internal system for employees, enabling efficient report generation, branch creation, customer management, and cash refund processing, with seamless integration of Temenos API and Sunline API for enhanced functionality.*
  Key Technologies: *S3, AWS Secret, Vue3, Express, Sunline API & Temenos API, MariaDB, GITLAB-CI, DOCKER*

REACT FULLSTACK DEVELOPER
Collabera Technologies (June 13, 2022-August 6, 2024)
Developing system and adding features to the existing system. Integration of various features. Creating a new API using loopback 4, a node.js library. When it comes to frontend, we are using react-saga with material ui library. The database they are using is MongoDb as no sql database and in relational database is Oracle SQL. The project I handled here is Wealth management more focused on bonds. I work under **Metrobank** as our client.

University of Caloocan City, Congressional Campus
Febuary 6, 2017
